Ford county were turned on full blast making a noise sufficient to wake everybody in town, but me, and a crowd soon gathered. So far as we can learn, about every fellow there could tell just how the building could have been saved if—in the mean time the building burned down a total loss. Some of the fixtures were saved. The night force at the depot which is but a short distance from the burning building kept busy keeping things wet. They hustled out an engine and had the gas tank hauled out of danger and by prompt action prevented any damage there. Now a word to the people who so promptly responded when the fire alarm was sounded. We have known some pretty healthy blazes put out by the old fashioned bucket brigade. We are informed that so far as known only one man had the presence of mind to take a bucket with him to the fire, and there was plenty of water quite near.

In almost every neighborhood someone has died from an attack of cholera or cholera morbus, often before medicine could be procured or a physician summoned.
